Dear Sir,

DEWAN'S OFFICE
23. JUN. 1930
5499

I am desired to forward a copy of a letter from Mr. Tipper, Minerals Adviser, Office of the High Commissioner for India, London, No.63068-T., dated the 6th December, 1929, with enclosure, regarding a proposed exhibition of Empire mineral resources to be held at the Imperial Institute, London, in December, 1930, and to request you kindly to let me know whether the Government of Mysore wish to participate with exhibits at the proposed Exhibition of Empire Mineral Resources, and, if so, what particular minerals found in the Mysore State they would like to exhibit.

2. It is proposed that all exhibits should be despatched so as to reach the Imperial Institute not later than the middle of September, 1930, and I am, therefore, to ask that a very early reply may kindly be sent to this enquiry.

Yours truly
Hem Dewan

6 From the Govt. to the Resident in Mysore, No. 1049 d. 2.9.30. Ytates, with regd to Sl. 5, that the Govt of India have enquired from the High Commr for India, London, by telegram whether the requisite room and wall space can be provided for the Mysore Exhibits and Plans; that the Mineral Advisor of the H.C. office has suggested that the main choice of the minerals to be sent from Indian States should be left to them, but that he would be glad to have, Ghuromite from Mysore, if possible, and requests that, if the Mysore Govt decide to participate in the Exhibition, arrangements may would be made to despatch the desired exhibits as early as possible direct to the High Commr's office, London marking the cases on the outside "Mineral Exhibits".
This information was called for as per order of the then 1st Member on page 2 of the notes, para 3

General and Revenue Secretariat. File No. of 1929.

Serial No.

The Residency letter is however silent as regards t
point as to what change if any will be made fo
making available the required space. But the
Director has however furnished the required in
formation in his letter of 19th July 1930 wherein
he has stated that the collection and preparation
of the Exhibits may cost Rs. 250 and that the cos
of the packing, transit, etc., will may amount t
another
Rs. 250 and has requested sanction to appropriat
a sum of Rs. 500 from the Mineral Survey &
Prospecting grant of the Dept during this year.
Perhaps the question of payment of charge if any
for the accommodation of space (150 sq. ft) in th
Exhibition Buildings may be considered when it is act
ally raised if at all it is raised. The matter is reported to t
immediate both by the Director of Geology & the Residency, bo
drafts (one G. O. Sanctg & the other to the Res^{cy}) are
put up and file dated for orders.

MR. K.P. Ref. 1st: Mr's orders in para 4.
8.9.30 The information required by the Member
has not been furnished. Moreover, it appears
to be too late to send any exhibits now, as a
the original letter of the Residency, the exhibits
were required to be in London not later than the
middle of September. Perhaps the idea may be
dropped

	To the Secy to the Hon'ble the Resident in Mysore. No. pol. 388 d. 7.10.30. states that the assumption that wall space corresponding to 150 sq. ft of room space is required is correct. Draft issued and file returned to Secretariat for perusal by the 3rd Member. M. K. 3rd Mem. 7.10.30.

Copy of letter No.63068.T. dated the 6th December, 1929, fro G. H. Tipper, Esq., Minerals Adviser, Office of the High Commissic for India, London, to the Secretary, Department of Industries and Labour, New Delhi.

I am directed by the High Commissioner to forward a copy of a letter from Lieut.-General Sir William Furse, Director of the Imperial Institute, on the proposed Exhibition of Empire mineral resources to be held at the Institute in December, 1930.

2. The exhibition will be open for four months, and it is expected that all the Dominions and Colonies will participate. The scope of the Exhibition is broad and will include not only mineral specimens and samples, but also, as far as they can be obtained, maps, plans, sections, photographs, etc., illustrative of the mining and metallurgical industries now in operation. Attention will also be drawn to those minerals of potential value and to those which offer possibilities of improved markets within the Empire. It is the hope of the Board of Governors of the Institute and the Advisory Council on Empire Minerals that public interest in the actual and potential value of the Empire as a source of minerals may be stimulated in the same way as was done by the Exhibition of Empire timbers held not long ago.

3. The High Commissioner is of opinion that India's co-operation in such a proposed Exhibition is very desirable as it will provide an unique opportunity of advertising Indian mineral deposits to a wide public. He accordingly recommends that the Government of India should issue instructions to the Geological Survey and Mines Department for assistance in making the Indian exhibits as complete as possible.

4. The High Commissioner thinks it probable that Indian States (Hyderabad, Kashmir, Travancore, Alwar and some of the Rajputana States) which possess mineral deposits may wish to participate, and he would suggest that their co-operation in the proposed Exhibition might also be asked for.

IMPERIAL INSTITUTE. \0

London, S.W.7.

27th November, 1929.

Dear Sir Atul,

You will remember that at the last meeting of the Board of Governors, the Governors approved a scheme, put forward by the Advisory Council on Minerals, to hold a Mineral Exhibition at the Imperial Institute about the end of next year.

In view of the fact that the Timber Exhibition held recently proved very successful in rousing public interest in Empire timber resources, the Governors agreed that a mineral exhibition was highly desirable and that it would be certain to stimulate public interest. They have in mind the fact that the Empire Mining and Metallurgical Congress (Triennial) will meet in South Africa next April, and the date of the Exhibition would therefore appear to be an apt one, following as it will soon after the Expire Congress meeting. It is intended to open the Exhibition on or about the 1st December 1930, and to keep it open about four months.

The Governors and Advisory Council are of the opinion that it would be a good plan, in this proposed exhibition, to aim chiefly at illustrating, in as attractive and interesting a way as possible, the more recently developed mineral areas of the Empire, while at the same time giving prominence to exhibits of such Empire minerals as offer possibilities of improved markets within the Empire. The Imperial Institute has recently given much attention to this question of the better marketting of Empire minerals. In the opinion of the Governors and Advisory Council, such an exhibition as is now proposed would present an excellent opportunity of focusing public interest on this question.

It is proposed to adopt a geographical arrangement, each part of the Empire having a separate exhibit.

The exhibits will include:-

1. Samples.
2. Flow sheets, charts and graphs;
3. Photographs and drawings;
4. Maps, plans and sections;
5. Panoramas;
6. Films.

1. Samples.

(a) Special samples. The size of these will be determined be the nature of the material available and the object aimed at in the exhibit.

(b) Lump minerals and rocks. These should be as far as possible of uniform size, irregular shape, and have extreme measurements about 7" x 5" x 3"

(c) Dressed ore and concentrates, showing products obtained in the course of treatment of the ore.

Each sample should be about 5lb. in weight excepting those instances in which the value is so high as to allow only of a small sample.

2. Flow sheets, charts and graphs.

The actual flow sheets, charts and graphs exhibited will as a rule be printed here, in order to keep all such exhibits on a uniform basis, with the use of the same type. We would, therefore, ask you to supply us with drafts for the printer very clearly drawn up. It is realised that in exceptional cases it may be desirable to depart from this general rule and exhibit the actual flow sheet received from overseas.

3. Photographs and drawings.

Photographs and drawings illustrative of typical mines and quarries (surface and / or underground) smelting and refining works, should be of large size, so that they can be seen distinctly on a wall at some distance. The photographs should be approximately 24" x 18".

4. Maps, plans and sections.

Ordnance and geological maps, together with sections and plans of workings of mines and quarries will be useful.

5. Panoramas.

The galleries of the Imperial Institute are provided with panaromas illustrating either scenery or industrial activity or both, in connection with the production of raw materials. It is felt the galleries would be improved by the addition of a few more mineral panoramas, and to obtain this end it is intended to approach various mining companies for the purpose of inviting them to have new panoramas constructed. These would be made use of as centres for the grouping of samples and other exhibits and would become a part of the permanent exhibit of the galleries of the Institute after the exhibition.

6. Films.

The Imperial Insitute is provided with a good cinema with seating

accommodation

accommodation for 400 people. It is proposed to show films illustratin mining and metallurgical industries during the exhibition, and for this purpose a supply of useful and interesting films will be required on loan during the period of the exhibition. The films sent for exhibitio should be clearly subtitled in clear language. The Imperial Institute cinema is not provided with sound- production apparatus, and the films supplied should therefore be of the silent variety.

Lectures.

In addition to the above mentioned exhibits, including films, it is proposed to have a series of lectures on Empire mineral resources and mining development. The lecturers will include various members of the Advisory Council on Mineral Resources and Advisory Technical Committees if necessary; but it is thought that the lecturers should, as far as possible, have first hand knowledge of local conditions as far as resources are concerned; and it is hoped that it will be possible to arrange for experts from overseas, who happen to be in England at the time, to give lectures.

Indian Exhibits.

As regards India, you will know what aspects of the mineral resources it will be desirable to illustrate by exhibits in this connection. Manganese, gold, mica, lead and zinc, chromite, tin and tungsten, copper, bauxite, magnesite, brown coal and kharagoda bitterns occur to us as features of outstanding interest, but others may very likely occur to you.

We should like to have one or more films illustrating the mining industry of India. If you know of such films, or if you can stimulate the interested companies to produce them, I am sure that, if properly produced, they would add greatly to the interest of the exhibits.

We intend to make a special feature of certain minerals which may seem to be worth advertising in connection with better marketing facilities. If you have any such, to which you would like prominence to be given at this Exhibition, we shall be glad to receive samples.

I hope very much that I may hear from you that you will be able to assist us along the lines I have indicated, and I shall be more than grateful for any suggestions that may occur to you.

It is requested that all exhibits should be despatched in time to

us at the Imperial Institute not later than the middle of September, 1930.

As soon as I hear from you that you are sending this letter on to your Government, with, I trust, a recommendation that all assistance should be given, I propose to communicate the information to the Director of the Geological Survey, Calcutta, who is our Corresponding Member in India, and who is in more direct touch with the interests concerned.

Yours sincerely,

We do not know what they would charge for the stall for our exhibit. The Director may see Rama Rao & ascertain what charges are likely to be made.

To

N. Rama Rao, Esquire, B.A.,B.L.,
Secretary to the Government of His Highness the Maharaja of Mysore,
Development Departments.

Sir,

With reference to your letter No.D.177/ Geol.138-29-2, dated 5th July 1930, calling for my opinion about the Mysore Government participating in the proposed Exhibition of Empire Mineral Resources to be held at the Imperial Institute, London, in December 1930, I have the honour to inform that it would certainly be advantageous to participate and thereby bring to the notice of the wider public the mineral deposits of the Mysore State. The scope of the Exhibition is broad and when the exhibits are properly illustrated with descriptive, Maps & Sections &c. they are likely to yield better marketing facilities. If the Government decide to cooperate, arrangements will be made to get together exhibits at a very early date.

During the Wembley Exhibition of 1924 this Department sent in nearly 104 exhibits of Minerals, Rocks, Building stones and the like. But out of this only a few were returned. Hence it has become necessary to get together fresh exhibits from the several areas. The Building Stones, which must form part of the Exhibition Collection, require preparation into Cubes and other forms. Some of them may have to be dressed and polished. All these may cost Rs.250/-. Further, on the previous occasion (Wembley Exhibition) the exhibits were all sent through the Industries & Commerce Department. Now this being only Empire Mineral Resources Exhibition the despatching of the Goods to England may devolve upon this Department, in which case the cost of packing, transit &c.

will have to be met and this may work upto another Rs.250/-. Altogether it will be necessary to provide for about Rs.500/- and I request sanction of Government to reappropriate for this purpose this amount from the Mineral Survey & Prospecting grant of the Department during this year. Immediate orders are solicited.

I have the honour to be,
Sir,
Your most obedient servant,

Director,
Mysore Geological Department.

From

Major G. Loch,

Secretary to the Resident in Mysore.

To

The Secretary to the Government of

His Highness the Maharaja of Mysore,

Development Departments.

Bangalore, the 10th September, 1930.

Proposed Exhibition of Empire mineral resources to be held at the Imperial Institute, London, in December, 1930.

Sir,

In continuation of my letter No.6881, dated the 2nd September, 1930, on the above subject, I am directed to state that a space of 150 square feet or more with corresponding wall space is available for Mysore and that there is no charge for reservation. The only expenditure likely to be incurred is the cost of erecting a temporary stand. I am to request you kindly to state as early as possible how much wall space is likely to be required by the Mysore Government, as the Government of India have asked to be informed of this by telegram.

I have the honour to be,
Sir,
Your most obedient servant,

Amberis

for SECRETARY TO THE RESIDENT.

Bangalore, the 18th September, 1930.

Sir,

I am directed to refer to your letter No.Pol.318/Geol 138 29-9, dated the 15th September, 1930 and to say that it is not quite clear what wall space is required but it has been assumed that the corresponding wall space to 150 square feet of room space is required.

The Government of India have been informed accordingly, but I am to ask you kindly to confirm that the assumption is correct.

I have the honour to be,
Sir,
Your most obedient servant,

for SECRETARY TO THE RESIDENT.
